

Integrity Clamp Covers™

EPDM Patented

PRODUCT DESCRIPTION

Integrity Products' Integrity Clamp Covers™ are designed to make it quick and easy to seal protrusions around pipe clamps on insulated piping systems. These clamp covers are made from a high-performing EPDM rubber for extra protection against temperature, mechanical damage, weathering, and UV and ozone exposure. The task of trying to install cladding around pipe clamps on insulated piping systems has traditionally been very difficult—requiring an excessive amount of time from even a skilled tradesperson to complete! Now with Integrity Clamp Covers™, you can achieve a neat and tidy finish in a fraction of the time.

PRODUCT APPLICATION

Integrity Products' Integrity Clamp Covers are a practical and cost-efficient solution to finish around pipe clamps on insulated piping systems. These covers enable a secure seal while featuring a drainage notch at the 6 o'clock position, allowing any moisture build-up to drain freely from the insulation system. The unique design of these Clamp Covers includes a radius that enables them to fit neatly onto the cladding. While installing this product, a bead of silicone is necessary on the flanged face of the Clamp Cover, ensuring not to silicone the drainage notch. The Clamp cover is then placed over the protrusion and secured onto the cladding using screws. Finally, a bead of silicone is required around the perimeter of the Clamp Cover to ensure a tight seal and minimize the risks of moisture ingress.

MATERIAL SPECIFICATIONS

MATERIAL(S)

60 Durometer
EPDM Rubber Cover/Cap

COLOR

Black

CHEMICAL DEFINITION

Ethylene Propylene
Diene Monomer

UV RESISTANCE

Excellent

OZONE RESISTANCE

Excellent

WEATHER RESISTANCE

Excellent

TENSILE STRENGTH

1600 PSI

ELONGATION

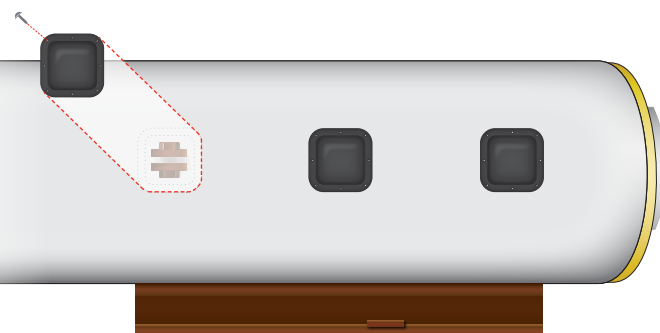

470%

TEMPERATURE RANGE

-58°F to 300°F (-50°C to 149°C)
Constant Temperature

OTHER SPECIFICATIONS

ASTM D2000 Classification

PRODUCT SIZES

Various sizes available.

INSTALLATION

Place Integrity Clamp Cover™ over pipe clamp. Fix clamp cover with supplied machine screws. Run a small bead of silicone along the edge trim, screw holes, and around the perimeter of the installed Integrity Clamp Cover™.
